

# indigoAgglomerator

Fine Particle Reduction System  
CLEAN COAL TECHNOLOGY

**FULLY COMMERCIALISED**

## Benefits

- Fine Particle Agglomeration and removal
- Opacity reduction – 30% to 70%
- Emission reduction – 20% to 40%
- PM<sub>2.5</sub> Reduction >70%
- Avoids more costly ESP rebuilds/upgrades

## Advantages

- Increased fuel options
- Great operating flexibility
- Low capital and operating costs
- Applications with Scrubbers, 'Baghouses'

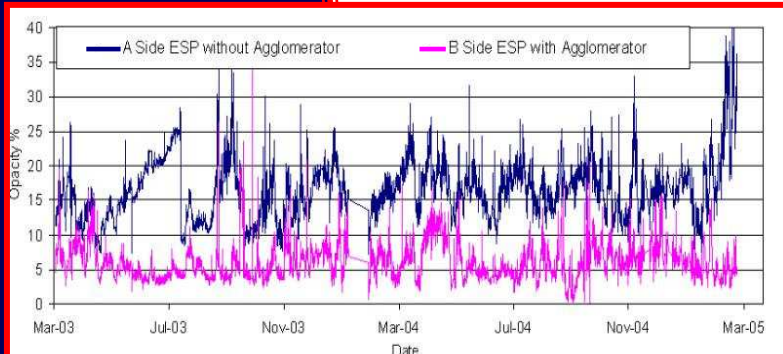

## Unique Technology

- Proven applications
- Electrostatic and fluidic processes
- Worldwide patents

## Installations

- Twelve (12) installations to date
- Growing order pipeline

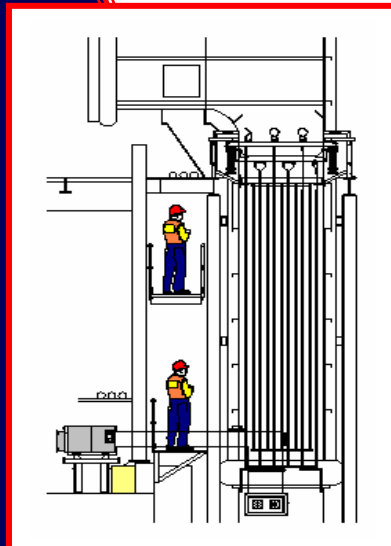

## 2 Year Opacity Graph

US Coal Fired Boiler  
250MW / 1,000,000 ACFM

125Mw Unit

PM<sub>2.5</sub>  
Mercury (Hg)
